TRAINING COURSES

About us

Capability Resources is a Registered Training Organisation (RTO) that provides nationally recognised training and assessment throughout Australia. All of our trainers and assessors have extensive vocational training, industry experience and hold relevant national training qualifications for trainers and assessors. Capability Resources offers training and assessments from National Training Packages with courses being held in our purpose built Skills Training Centre. Alternatively, training and assessment customised for employers can be held at suitable locations on your site. The qualifications we issue are nationally recognised within the Australian Qualifications Framework (AQF). Students will need to possess a sufficient level of English language, numeracy and literacy to maximise your success in completing this training. There are a number of ways we can make adjustments to your training and assessment that will allow you to achieve the learning outcomes and support you with any Language, Literacy and Numeracy (LLN) needs.

Welding Safety

TRAINING COURSES

Capability Resources offer a range of training courses to meet your specific requirements.

WTIA Accredited Safe Cutting and Welding and MDG 25 (2 days)

Endorsed by the WTIA and based on their TN7 and TN22 – the required safety component for MDG 25 compliance. The course also includes relevant components of MDG25 and Australian Standards including AS 1674.2 'Safety in welding and allied processes Part 2: Electrical' and AS 4839 'The safe use of portable and mobile oxy-fuel gas systems for welding, cutting, heating and allied processes'. The course is competency based with theory and practical components.

Introduction to Safe Cutting and Welding and MDG 25 (1 day)

Based on the WTIA's TN7 and TN22 – the required safety component for MDG 25 compliance. The course also includes relevant components of MDG25 and Australian Standards including AS 1674.2 'Safety in welding and allied processes Part 2: Electrical' and AS 4839 'The safe use of portable and mobile oxy-fuel gas systems for welding, cutting, heating and allied processes'. The course is not as comprehensive as the 2 day course however it will provide participants with the basics for safe cutting and welding. This course is run in two x 4 hour modules, gas and electrical.

Safe Cutting and Welding Refresher (4 hours)

This is a refresher only and assumes that the participant has attended one of the courses above within the last three years. This is a brief refresher of the critical components with a prime focus on the practical aspect i.e. start-up and shutdown procedures, pre-operational inspections.
