APM403

The APM403 is the latest addition to the APM* family, and is available in two different configurations. The Solo (APM403S) version is fitted as standard on all generating sets intended for LV industrial applications. The Parallel (APM403P) version allows coupling of gensets or mains paralleling. This product meets the needs of professionals in terms of remote management, with the integration of numerous communication peripherals (3G, 4G, etc.) The APM403 is integrated in the console.

PRESENTATION

DESCRIPTION OF THE APM403

- Screen scroll/menu change keys
- Circuit breaker opening/closing button
- Fault reset button
- Button for confirming, editing or returning to the home screen
- Navigating between
- Genset start/stop button
- Buzzer deactivation button
- Screen scroll keys

REMOTE MANAGEMENT/SUPERVISION

- Web interface - WEBSUPERVISOR

ADVANTAGES OF THE APM403

- Flexible configuration
- Flexible communication tools
- Intuitive navigation and simplified genset or power plant operation

FUNCTIONALITY

- Start-up configurations
- Measurements and display
- Control

SIMPLE CONTROL OF GENERATING SETS AND POWER PLANTS + NUMEROUS CONNECTIVITY
