WE CAN POWER YOUR FUTURE.

Healthcare is changing rapidly, and hospital and clinic staff are working hard to improve patient outcomes while simultaneously controlling costs. It's not a simple task, and it's one that's brought even more high-tech solutions to medical facilities. With this new technology comes an increased need for reliable, 24/7 backup

ASSESSING FACILITY NEEDS

Given the fact that power can be a life-sustaining necessity in the hospital setting, reliable backup power is essential. To provide a “No-Break” power supply (uninterruptible power with zero service interruptions), two independent power sources provide redundancy and risk reduction, rather than depending on a single source of inbound power.

POWER CONSIDERATIONS

Hospitals, clinics, pharmacies and long-term care facilities are already some of the most complex places for backup power. And they're becoming even more high tech. Yet each facility has its own needs and requires a customized solution to protect the significant investments made in state-of-the-art equipment. Here are some considerations the KOHLER team looks at when discussing your facility's unique needs.

- Total system integration
- Performance
- Uptime and reliability
- Redundancy

THINKING BEYOND HOSPITALS

Kohler makes it easy. From planning to post installation, our team will take care of you every step of the way—with a power solution customised to your needs.
