Capability Statement

Your Partner in Power, Compliance and Productivity.

With more than two decades of experience, Capability Resources and EZenergy are here to help with your business needs.

Power – when you need it. Success is built in working with and providing industry with generators and power generation support equipment. Buy it or hire it.

Compliance – satisfying the ever changing and emerging plant compliance requirements industry face can be challenging. Our experienced team of electrical and mechanical personnel understand and deliver plant inspection, service and maintenance requirements.

Productivity – return on investment. Streamline the process to have compliant plant on site and operating.

Introducing Plant to Mine Sites.

Capability Resources is recognised as an industry leader in helping mines and contractors navigate site specific Introduction to Site (ITS) processes prior to plant being used on site.

Equipped with a team of competent ITS Inspectors, plant inspections conducted by Capability Resources help streamline the process to confirm that plant is safe to use, complies with site specific requirements and that Plant Safety Files are in order.

Introduction to Site Support.

Capability Resources has built a solid reputation over many years working with key personnel at mines and contractors to introduce plant to mine sites.

Key areas of support include:

- Plant inspections – physical and via video
- Address non-conformances
- Audit Plant Safety Files
- Complete site specific ITS documentation
- Provide electronic reports, with embedded photo evidence
- Access to cloud-based reporting and PSF system
- Provision of Capability Resources MDG15 MultiSite inspection
- Thermal imaging

The range of plant inspections include, but are not limited to Surface mobile, medium, road going vehicles, cranes, pumps, compressors, drill rigs, electrical and ancillary equipment.

Power Generation / Sales and Hire.

EZenergy has built a reputation in providing a range of compliant generators to help industry with generator applications.

Equipped with extensive generator experience, working with EZenergy will give you confidence to select the appropriate generator for your application, whether you need to purchase or hire.

EZenergy has a range of generators for sale or hire from 1kVA to 4500kVA to meet your needs.

- Skid Mounted Generators
- Trailer Mounted Generators
- Frame Mounted Generators
- Portable Generators
- Container Generators
- HV Motivator Packages

Generator Servicing / Meg tests: EZenergy can help with the provision of ongoing generator servicing / meg tests requirements, as part of the generator hire or generator purchase arrangements.

Generator Introduction to Site (ITS): EZenergy, via Capability Resources is able to provide Introduction to Site generator inspections to meet your site specific requirements.

Generator Support: EZenergy provides 24/7 emergency generator support.

Power Generation and Support.

EZenergy has supported industry with a range of power generation services over many years, including:

- Technical site surveys
- Single point of contact / project management
- Design
- Technical support
- Onsite generator servicing
- Grid synchronising
- Synchronising of generators, load demand control available
- Remote monitoring
- Onsite refuelling management
- Transportation

Hire / Sales Items.

Power Generation Equipment. In addition to generators, EZenergy provides power generation support equipment including:

- Cables and distribution to suit generators
- Transformers 415V- 1000V, 3.3, 6.6, 11, 22kV various MVA sizes available
- Load banks
- Remote monitoring available
- External fuel cells
- Portable fuel cell & pump packages
- Fluid Chillers
- Manual and automatic transfer switches
- Spot coolers

Industry Solutions - We Power Industries.

Mining, Construction, Hospitality, Manufacturing, Shutdowns, Events, Retail, Utility Provider Support, Caravan, Camping and Home, Rail, Storms and Power Outages.

Safe - Reliable - Efficient - Ready 24/7

Service and Maintenance.

Capability Resources are proud to have a team of qualified electrical and mechanical technicians who are able to deliver reliable service and maintenance to a wide range of industries.

We provide specialist energy services across a wide range of sectors, including mining, utilities, construction, defence, retail, health care, education, and hospitality.

We can offer one-off call-out services or routine ongoing maintenance contracts.

Service and Maintenance Activities.

Capability Resources is equipped with workshops, custom built service truck and service vehicles to support industry with the provision of service and maintenance activities.

These include:

- Generator servicing
- Generator load banking
- Generator meg tests
- ITS / MDG15 plant upgrades
- Compliance inspections - introduction to site
- Servicing, testing, repairs and general maintenance
- Standby generator battery charging systems
- 24/7 emergency callouts
- Diesel refuelling
- Emergency generator replacement services
