Capability Statement

Your Partner in Power, Compliance and Productivity

With more than two decades of experience, Capability Resources and EZenergy are here to help with your business needs.

Power – when you need it. Success is built in working with and providing industry with generators and power generation support equipment.

Compliance – satisfying the ever changing and emerging plant compliance requirements industry face can be challenging. Our experienced team of electrical and mechanical personnel understand and deliver plant inspection, service and maintenance requirements.

Productivity – return on investment. Streamline the process to have compliant plant on site and operating.

Introducing Plant to Mine Sites

Capability Resources is recognised as an industry leader in helping mines and contractors navigate site specific Introduction to Site (ITS) processes prior to plant being used on site.

Equipped with a team of competent ITS Inspectors, plant inspections conducted by Capability Resources help streamline the process to confirm that plant is safe to use, complies with site specific requirements and that Plant Safety Files are in order.

Introduction to Site Support.

Key areas of support provided by Capability Resources include:

- Plant inspections – physical and via video
- Address non-conformances
- Audit Plant Safety Files
- Complete site specific ITS documentation
- Provide electronic reports, with embedded photo evidence
- Access to cloud-based reporting and PSF system
- Provision of Capability Resources MDG15 MultiSite inspection
- Thermal imaging

The range of plant inspections include, but are not limited to Surface mobile, medium, road going vehicles, cranes, pumps, compressors, drill rigs, electrical and ancillary equipment.

Power Generation / Sales and Hire

EZenergy has built a reputation in providing a range of compliant generators to help industry with generator applications.

Equipped with extensive generator experience, working with EZenergy will give you confidence to select the appropriate generator for your application, whether you need to purchase or hire.

Generators for sale or hire from 5kVA to 4500kVA to meet your needs.

Generators - Safe - Reliable - Efficient - Ready 24/7

- Skid Mounted Generators
- Trailer Mounted Generators
- Frame Mounted Generators
- Portable Generators
- Container Generators
- HV Motivator Packages
- Hybrid Generators
- BESS Solutions
- Data Centres

Authorized Distributor

Generator Servicing / Meg tests

Generator Support 24/7

Generator Introduction to Site (ITS)

Generator installation and maintenance

Power Generation Equipment / Sales and Hire

In addition to generators, EZenergy provides power generation support equipment.

- Cables and distribution to suit generators
- Transformers 415V- 1000V, 3.3, 6.6, 11, 22kV various MVA sizes available
- Load banks
- Remote monitoring available
- External fuel cells
- Portable fuel cell & pump packages
- Fluid Chillers
- Manual and automatic transfer switches
- Spot coolers

Power Generation Support

EZenergy has supported industry with a range of power generation support services over many years.

- Technical site surveys
- Single point of contact / project management
- Design
- Technical support
- Onsite generator servicing
- Grid synchronising
- Synchronising of generators, load demand control available
- Remote monitoring
- Onsite refuelling management
- Transportation

Data Centres

EZenergy and Rehlko - the energy insurance you need

- Customised power solutions
- Standard solutions
- Specific Designs
- In-depth knowledge
- Dedicated technical support
- Meet global emissions standards
- Planning to post installation

Reliable power for your data centre - we've got you covered

Emergency Power Generation

Ready to go 24/7

Industry Solutions

In house expertise - EZenergy is equipped with in-house expertise across all areas. From a single stand alone Generator to multiple synchronised Generator Power Stations, Grid Synchronisation and ATS's also available.

Experience and Technical Knowledge - EZenergy is a reputable generator rental company with proven technical experience, knowledgeable staff and modern equipment so you can focus on your core business.

Operational Support - EZenergy will endeavour to minimise downtime to ensure that all fleet and systems are of the highest standard to enable works to be delivered on time and on budget.

Flexibility - EZenergy will provide the necessary flexibility of all temporary resources without having to invest in large amounts of Capital Expenditure yourself.

Quality - Assurance that our generators are maintained to the highest standards with characteristics of low emissions, low noise levels, fuel efficiency and reliability.

Compliance - EZenergy has a comprehensive understanding of the compliance issues relating to the supply of Generators and standards that must be met.

Minimise Risk - Engage EZenergy to provide you with a compliant generator. Options include site survey, transport to site, site connection, necessary site ITS and meg test documentation, ongoing meg test, servicing and refuelling arrangements.

Turnkey Solutions - From assessment of a need to final de-commissioning at site and even fuel management if need be – EZenergy does it all.

Remote Monitoring - EZenergy has remote monitoring available on all our generators which enables monitoring of alarms, view load trends and fuel levels.

Emission Control and Fuel Efficiency - EZenergy is committed to introducing advanced emission control technology and fuel efficient generators, including Stage V engines.

Battery Energy Storage Systems (BESS) / Hybrid Generators - EZenergy has access to world leading BESS and Hybrid Generators to help with your energy solutions.

Commitment - EZenergy provides a 24/7 commitment to you.

Confidence - EZenergy is your "One Stop Shop"

Package it up with EZenergy - Safe - Reliable - Efficient - Ready 24/7

Service and Maintenance

Capability Resources are proud to have a team of qualified electrical and mechanical technicians who are able to deliver reliable service and maintenance activities.

We provide specialist energy services across a wide range of sectors, including mining, construction, hospitality, manufacturing, events, retail, shutdowns, utilities, caravaning, camping, homes, rail, health, education, government agencies, defence, storms and power outages.

We can offer one-off call-out services or routine ongoing maintenance.

Capability Resources is equipped with workshops, custom built service truck, lube trailers and service vehicles to support industry with the provision of service and maintenance activities, including:

- Generator servicing
- Generator load banking
- Generator meg tests
- ITS / MDG15 plant upgrades
- Compliance inspections - introduction to site
- Servicing, testing, repairs and general maintenance
- Standby generator battery charging systems
- 24/7 emergency callouts
- Diesel refuelling
- Emergency generator replacement services

Volvo Penta Dealer – Industrial Engines

Capability Resources is a Volvo Penta Dealer – Industrial Engines allowing access to the world-leading supplier of Volvo Penta engines. Whether it be registration, products, parts, warranty or support, Capability Resources is now able to help across the Hunter Region, NSW.

VOLVO PENTA

Capability Resources and EZenergy have established a solid reputation in powering projects for many years.

Strategically aligned with world renowned brands including Rehlko and Volvo Penta for generators, BESS solutions, hybrids, engines and more.

Dedicated to the supply and hire of generators designed with advanced emission control and fuel-efficient technologies, Capability Resources is well equipped to provide innovative, reliable, cost-effective and environmentally friendly power generation solutions.

Operating from large fully equipped workshops, supported by mobile service vehicles and lube trailers, Capability Resources professional workforce is ready for emergency response, power outages, generator servicing, parts, warranty, upgrades, installations, engines and 24/7 support.

Additionally, Capability Resources is an industry leader in helping mines and contractors navigate site specific Introduction to Site (ITS) plant inspection requirements.

As an SME, Capability Resources is committed to developing our future workforce through the ongoing implementation of electrical apprenticeship pathways in power generation.
